

# Maintenance and Service Manual

## Wheelchair-Accessible Lowered Floor Conversion (Foldout Ramp) featuring 2008 - 2010 **Chrysler Minivans**

*Because Life is a Moving Experience*

**! WARNING**

Read manual before servicing. Failure to do so may result in serious bodily injury and/or property damage.

# INTRODUCTION

## Introduction

Braun lowered floor conversions are designed to provide years of pleasure and mobility independence. Familiarity with proper operation and maintenance procedures will help ensure safe, troublefree operation.

Safety precautions, maintenance and troubleshooting details are provided. Wiring Diagrams and Electrical Schematics are provided to aid in troubleshooting. A Repair Parts section with exploded views and corresponding parts lists are also provided.

Refer to the information applicable for the conversion you are servicing and disregard the information that does not apply.

### Warranty and Return Authorization

Refer to the Limited Warranty Booklet for detailed terms and provisions. When processing any war-

ranty claims (parts, repairs, etc.), all requests must be processed through the Braun Corporation Product Support Department. Product Support will issue a Return Material Authorization (RMA) number and detail the procedures required for processing returns and/or authorizing credit.

## ⚠ WARNING

**Maintenance, lubrication, troubleshooting and service procedures must be performed as specified by an authorized service technician. Failure to do so may result in serious bodily injury and/or property damage.**

The last eight digits of the vehicle identification number (VIN) **must be provided when filing a warranty claim or ordering parts.**

## Operation Quick Reference Guide

### Conversion Operation Overview

This overview provides a simplified explanation of operation. Read the entire owner's (operator's) manual for complete details. Contact The Braun Corporation at 1-800-THE LIFT® if any of this information is not understood.

### Power Operation

Power functions are managed by the electronic control system. The control system can be activated using the OEM remote keyless entry transmitter or one of the interior control switches detailed in the operators manual.

OEM Remote Keyless Entry Transmitter

Press and release this switch two times (\*2)

Interior mounted control switches display one of these graphics.

### One-Touch Control Activation

Conversion power door, kneel and ramp functions are activated by **pressing and releasing** a control switch (press and release remote entry transmitter button twice).

**Open Functions:** When activating the Open functions, the power door opens, the kneel system lowers the rear of the vehicle and the ramp deploys.

**Close Functions:** When activating the Close functions, the ramp stows, the kneel system raises the rear of the vehicle and the power door closes.

### Manual Operation

The passenger power sliding door and ramp can be manually operated. Read the owners manual for further details.

# SAFETY PRECAUTIONS

## Safety Precautions

### ⚠️ WARNING

Read this manual, the conversion's operator's manual and supplements before performing operation, maintenance or service procedures. Failure to do so may result in serious bodily injury and/or property damage.

- ⚠️ **WARNING** Maintenance and service procedures must be performed only by authorized service personnel.
- ⚠️ **WARNING** Perform maintenance and lubrication procedures exactly as outlined in the Maintenance and Lubrication Schedule contained in this manual.
- ⚠️ **WARNING** Perform troubleshooting and service procedures as outlined in this manual and/or service bulletins supplied with replacement parts.
- ⚠️ **WARNING** Replacement parts must be Braun authorized replacements.
- ⚠️ **WARNING** Do not attempt to interface aftermarket control systems without authorization from The Braun Corporation.

- ⚠️ **WARNING** Do not use accessory devices not authorized by The Braun Corporation.
- ⚠️ **WARNING** Keep clear of area in which the vehicle kneels (lowers).
- ⚠️ **WARNING** Keep clear of area in which ramp operates.
- ⚠️ **WARNING** Never modify (alter) a Braun Corporation lowered floor minivan conversion.
- ⚠️ **WARNING** Do not install a raised top on a Braun Corporation lowered floor minivan conversion.
- ⚠️ **WARNING** Use of a Braun Corporation lowered floor minivan conversion for towing is prohibited.
- ⚠️ **WARNING** Failure to follow these safety precautions may result in serious bodily injury and/or property damage.

## Towing

### Towing with a Lowered Floor Conversion

Use of a lowered floor conversion vehicle for towing is **prohibited**.

### Transporting a Lowered Floor Conversion

If case of service, The Braun Corporation recommends that lowered floor conversion vehicles be transported on a trailer rather than towed with one set of wheels suspended and the other set of wheels remaining in road contact.

**Trailer Transport**

### Maintenance and Service Requirements

Braun lowered floor minivan conversions must be maintained and serviced by a Braun authorized service representative who has attended and been certified by The Braun Corporation Sales and Service School for Braun Mobility Products.

Read and become familiar with the operating procedures outlined in the applicable operator's manual and the maintenance and troubleshooting information contained in this manual before beginning operation, maintenance or service procedures. Contact The Braun Corporation at 1-800-THE LIFT® if any of this information is not understood.

**One-Touch Electronic Control System:** The electronic control system provides simple one-touch activation of power functions. For your convenience, the control system can be activated using the OEM remote keyless entry transmitter or one of the interior switches identified in the operator's manual.

**Braun Corporation Aftermarket Control Systems Policy:** The Braun Corporation manufactures dedicated control systems for its products. These control systems have been designed and tested for use in conjunction with specific Braun products. Braun control systems are the **only** control systems authorized for use with Braun products.

**Do not** attempt to interface aftermarket control systems without authorization from The Braun Corporation. **To do so may result in serious bodily injury and/or property damage.**

# MAINTENANCE and SERVICE

## Preventive Maintenance

Maintenance is necessary to ensure safe and trouble free conversion operation. Encourage the consumer to perform preventive maintenance procedures. General preventive maintenance consisting of inspections along with cleaning procedures should be a part of the consumers routine.

Keeping the passenger slide door lower track pan free of debris, ice and snow is one of the **most effective preventive maintenance practices** to exercise. Regular preventive maintenance procedures will increase the service life of the conversion, as well as enhancing safety.

The consumer should inspect and clean frequently and routinely (minimum four weeks or 100 cycle intervals).

**Note:** A Preventive Maintenance section is provided in the operator's manual.

## Maintenance and Lubrication Schedule

Normal vehicle maintenance must be performed as outlined in the OEM-supplied owner's manual. This maintenance is not the responsibility of The Braun Corporation.

The maintenance and lubrication procedures outlined in this schedule must be performed at the recommended scheduled intervals by a Braun authorized service representative.

**Clean** specified components and the surrounding area **before applying lubricants**. When replacing lubricated components, be sure to lubricate during installation procedures.

A "dri-film" style of light oil should be applied where \*Light Oil is called out (goes on wet and then dries). Lubricants of this type are available that do not attract dust and other debris.

Use of improper lubricants can attract dirt or other contaminants which could result in wear or damage to components. Avoid lubricants that can leave stains.

Some lubricants referenced in the schedule are available from The Braun Corporation (part numbers provided where specified).

All listed inspection, lubrication and maintenance procedures should be repeated at "3 month" intervals following the scheduled "6 month" maintenance. These intervals are a general guideline and will vary according to frequency of use and conditions. Exposure to severe conditions (weather, environment, contamination, heavy usage, etc.) may require inspection and maintenance procedures to be performed more often than specified.

**Discontinue use immediately** if maintenance and lubrication procedures are not properly performed, or if there is any sign of wear, damage, improper operation or any abnormal condition. Contact your sales representative or call The Braun Corporation at 1-800-THE LIFT®. One of our national Product Support representatives will direct you to an authorized service technician who will inspect your conversion.

### **WARNING**

**Maintenance and lubrication procedures must be performed as specified by an authorized service technician. Failure to do so may result in serious bodily injury and/or property damage.**

## Maintenance and Lubrication Schedule

<b>3 Months</b>	<b>Foldout Ramp:</b> Foldout ramps vary in design. Disregard references to components not present.	
	Outboard ramp extension hinge and fasteners	Clean and lubricate with *Light Oil. Resecure or replace fasteners as needed
	Inspect ramp inboard pivot points (bolts/screws and bushings/bearings) for positive securement, wear or damage	Clean and lubricate with *Light Oil. Tighten, replace or correct as needed
	Inspect ramp fold pickup bearing for positive securement, alignment, wear or other damage	Replace or correct as needed. If bearing retaining screw is not secure or is removed for service, apply Blue #242 Thread Locker Loctite to retaining screw and tighten.
	Inspect ramp fold arm for positive securement, alignment, wear or other damage	Tighten, replace or correct as needed
	Inspect ramp fold arm bearing slot for excessive wear or damage	Replace if needed
	Inspect ramp extension chain for proper alignment, securement or other defects	Realign, resecure, replace or otherwise correct as needed
	Inspect ramp floor mounting hardware for securement (loose or missing)	Resecure, replace or correct as needed
	<b>General Items</b>	
	Lower power slide door track	Inspect for obstructions and clean (vacuum or blow out debris using compressor)
Wheelchair and occupant restraint belts and tie down track	Inspect for any defects such as cuts, fraying or any malfunction of belt, buckle or securement hardware. Clean dirt and debris from tie down track. Replace immediately if damaged.	
Inspect removable seat bases for proper engagement of latching mechanisms	Replace or correct as needed	

# MAINTENANCE and SERVICE

## Maintenance and Lubrication Schedule

<b>6 Months</b>	<b>Perform all procedures listed in previous section also</b>	
	<p><b>Power Fold Ramps:</b></p> <ul style="list-style-type: none"> <li>• Ramp flap (extension) chain</li> </ul>	Lubricate with Anti-Seize (14 oz. caulk tube available per Braun part no. 24710)
	<p>Remove ramp housing cover/rear vertical panel and inspect:</p> <ul style="list-style-type: none"> <li>• Top mount bracket bolts for securement (loose or missing)</li> <li>• Motor mounting bolts for securement (loose or missing)</li> <li>• Ramp fold arm securement (collar and mounting screws)</li> <li>• Microswitches securement and adjustment</li> <li>• Microswitch wires and terminals for securement or damage</li> <li>• Magnetic switch (optional)</li> </ul>	<p>Resecure, adjust microswitches, replace damaged parts or otherwise correct as needed.</p> <p><b>Note:</b> See 2008 Foldout Ramp Exploded views on pages 19B-20B, 23A-24A and 23B-24B.</p>
	<p><b>Inspect power source:</b> Vehicle battery, 50 ampere fuse, vehicle engine compartment fuse block and driver side under dash-mounted fuse block.</p>	Resecure, repair or replace
	<p><b>Inspect kneel actuator assembly for:</b></p> <ul style="list-style-type: none"> <li>• Actuator mounting pin securement (micro-switch activation block)</li> <li>• Inspect chain for misalignment, wear or damage</li> <li>• Inspect chain master-links for securement</li> <li>• Inspect chain idler (pulley) for securement, wear, damage or misalignment</li> <li>• Inspect electrical harnesses for positive connections, proper routing, wear or other damage</li> <li>• Kneel microswitch(es) securement, wear or other damage</li> </ul>	Realign, resecure, replace damaged parts or otherwise correct as needed. Note: See Kneel Actuator Assembly exploded view on page 27.
	<p>Kneel electrical override</p> <p>Kneel assembly chain</p>	<p>Check operation</p> <p>Lubricate with Anti-Seize (14 oz. caulk tube available per Braun part no. 24710)</p>

<b>Consecutive 3 Month Intervals</b>	<p><b>Repeat all</b> previously listed inspection, lubrication and maintenance procedures at <b>3 month</b> intervals.</p>
--------------------------------------	--

## Troubleshooting Diagnosis Chart

### **⚠ WARNING**

Troubleshooting and repair procedures must be performed as specified by an authorized service technician only. Failure to do so may result in serious bodily injury and/or property damage.

**Operation should be discontinued immediately** if a conversion problem occurs. **Repairs should not be attempted by the consumer.** Contact the sales representative or call The Braun Corporation at 1-800-THE LIFT®. One of our national Product Support representatives will direct you to an authorized service technician who will inspect your vehicle.

The cause of the problem can be determined by locating the function and related symptom in the Troubleshooting Diagnosis

Charts. The specific cause and remedy can then be determined by process of elimination. Electrical Schematics and Wiring Diagrams are provided to aid in troubleshooting.

A Repair Parts section with exploded views and corresponding parts lists is also provided. **Correct the problem if possible. If the problem continues, contact The Braun Corporation.**

FUNCTION	SYMPTOM	POSSIBLE CAUSE	REMEDY
<b>1.00 NO OPERATION</b>	<b>1.10 No Power to Conversion Systems (Circuit Problem)</b>	1.11 Poor ground connection 1.12 Battery terminals dirty 1.13 Battery damaged 1.14 Battery discharged 1.15 12 volt source (check fuses for 12 volts) 1.16 Circuit breaker tripped or damaged	Clean and tighten Clean and tighten Replace Charge battery Check for blown fuse, loose terminals or broken wire or cable Reset or replace
	<b>1.20 Power to Conversion Systems But No Operation</b>	1.21 Transmission not in Park 1.22 Chrysler Slide Door Master Lock Out switch in OFF position 1.23 Slide door handles have been manually operated 1.24 Loose connection 1.25 Broken wire 1.26 Wire terminal 1.27 Control switch damaged 1.28 OEM keyless transmitter (FOB) does not function properly or damaged 1.29 Braun electronic controller	Engage transmission in Park Press switch to ON position  Press a control switch  Clean and tighten Repair or replace Crimp tightly to wire Replace Relocate to avoid interference, replace battery or replace transmitter. See OEM owner's manual. Press main electronic controller reset button and try operation again. If no operation - run serial diagnostics test. If no operation - contact Braun Product Support.

# TROUBLESHOOTING

FUNCTION	SYMPTOM	POSSIBLE CAUSE	REMEDY
<b>2.00 KNEEL SYSTEM (LOWER)</b>	<b>2.10 No Lower Operation</b>	2.11 See 1.00 2.12 Kneel On/Off switch is in OFF position. 2.13 Actuator harness disconnected or otherwise damaged 2.14 Actuator damaged. <b>Note:</b> Actuator can be checked with kneel override switch (under driver side third row seat). 2.15 Chain disconnected or otherwise damaged 2.16 Kneel Lowered microswitch harness disconnected/damaged or microswitch damaged 2.17 Kneel electrical override switch damaged or disconnected	Press switch to ON position  Connect, repair or replace  Press the kneel electrical override switch to test actuator (driver side third row seat). Replace if damaged.  Connect, repair or replace  Connect/repair harness or replace microswitch  Check connection or replace
	<b>2.20 Faulty Kneel (Lower) Operation</b>	2.21 Mechanical binding 2.22 Misalignment or damage to kneel system components. Inspect kneel actuator assembly for: <ul style="list-style-type: none"> <li>• Actuator mounting pin securement (loose or missing)</li> <li>• Inspect chain for wear, misalignment, or other damage</li> <li>• Inspect chain pulley for securement, wear, misalignment or damage</li> </ul>	Check and correct Connect, replace or otherwise correct as needed

## Ramp Microswitch Adjustment

The ramp motor assembly is equipped with two microswitches, the deploy microswitch and stow position microswitch.

The deploy microswitch cuts the ramp motor when the platform reaches a position where the ramp will complete the deploy function by the force of gravity (ramp to ground level).

The stow position microswitch determines the full stow position (how far the ramp stows inside the vehicle).

Remove the ramp motor assembly interior cover to access microswitches (located rear of the passenger slide door). **Note:** It is not necessary to remove any other interior panels.

**Stow Position Microswitch Adjustment:** An adjustment screw moves the position of the stow position slider assembly inward and outward. Turn the screw clockwise to adjust the ramp stowed position inward. Turn the screw counter-clockwise to adjust the ramp position outward. **Ensure** the ramp does not obstruct the power slide door (check per following procedure).

**Door Obstruction:** Manually open the slide door fully. Move the top of the ramp out slightly until the ramp enters the path of the door. Press a control switch. **Caution:** Observe and **stop door** if ramp does not stow fully **to avoid damage**. If the ramp stows fully and the door closes, the microswitch

is adjusted properly. If the door contacts the ramp, the stow microswitch needs to be adjusted inward. Adjust microswitch slider slightly and repeat procedures.

**Deploy Microswitch Adjustment:** The deploy microswitch is cam activated. The microswitch is secured with two mounting screws. The microswitch can slide in a rotary motion to change its position in relation to the cam. The deploy microswitch cuts power to the ramp motor, allowing the ramp to gravity down and complete the deploy function. Adjust the switch to allow gravity to complete the deploy operation. Ensure the ramp motor shuts off before the ramp reaches the horizontal position or below.

## Kneel Microswitches

The actuator assembly is equipped with two fixed position microswitches (not adjustable). A bracket (vertical tab) at the end of the actuator shaft trips the microswitches as the shaft extends and retracts. If the kneel switches are not activated (tripped), the kneel actuator will clutch (ratchet) continuously for approximately 10 seconds at end of actuator travel.

**Kneel Actuator Access:** Remove the kneel assembly cover on the vehicle floor under the third row seats. See Switch and Component Location Diagram.

**Note:** Changing the kneel chain length is **prohibited**.

# BELOW FLOOR OBSTRUCTIONS

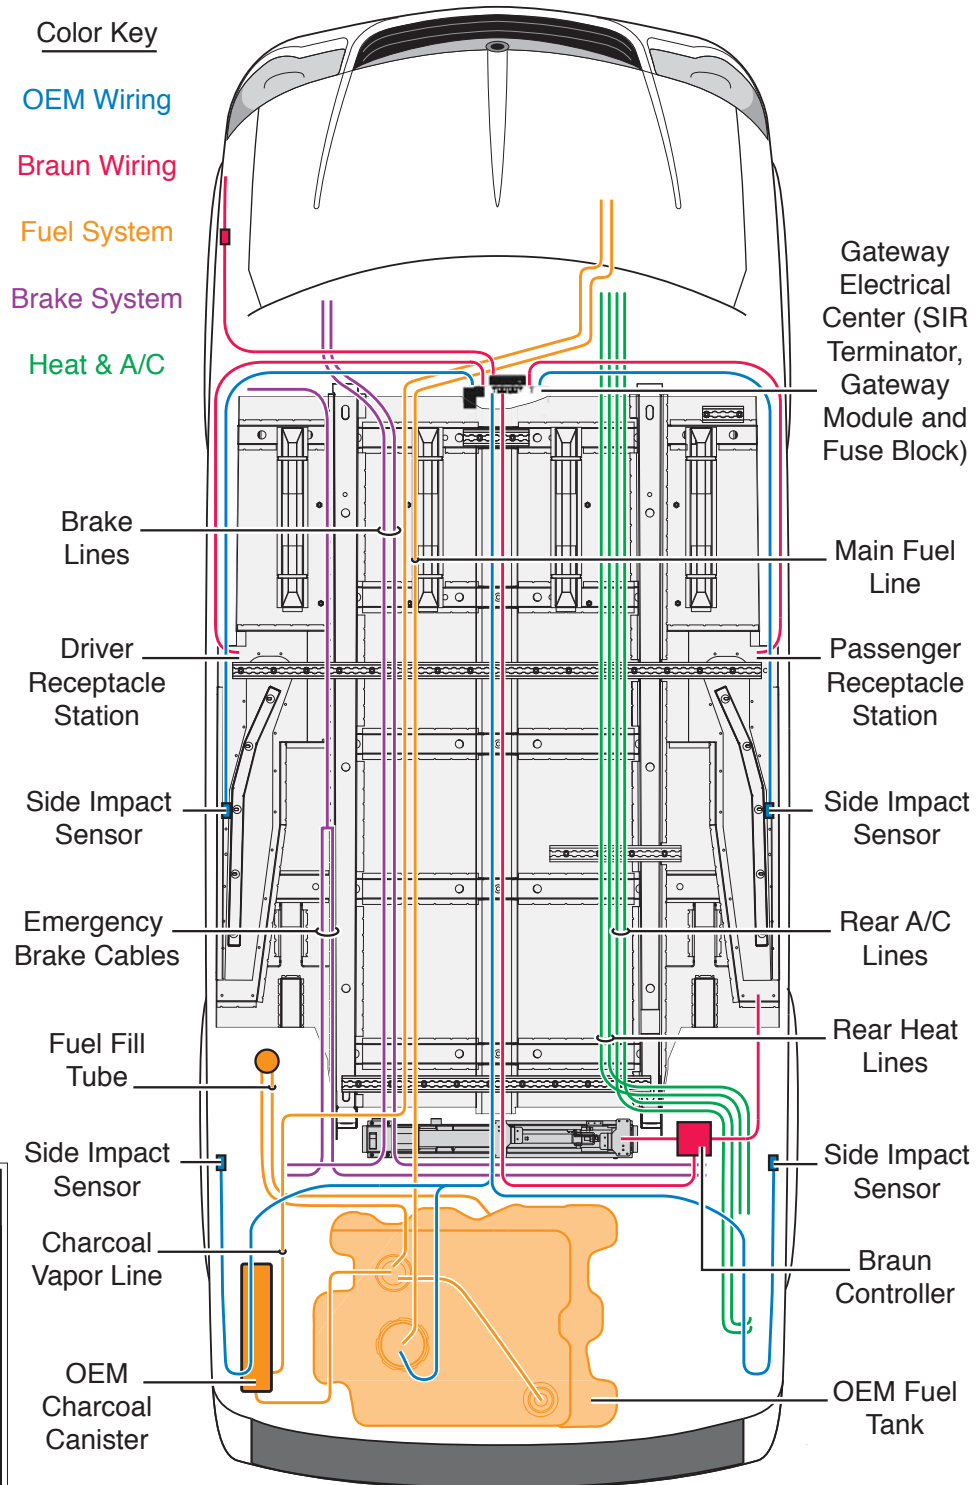

## 2008 Chrysler Lowered Floor Minivan (Foldout Ramp) Conversion

When installing an electrical tie-down, power seat or other auxiliary device, obstructions below the floor must be avoided. Obstructions include wiring, fuel system, brake lines, etc. Installers must be aware of these obstructions.

Refer to this illustration when installing aftermarket equipment to avoid contacting or damaging vital components under the floor.

**Drilling or cutting into such obstructions may result in potential hazards as well as property damage.**

**Note:** Some wiring harnesses shown may not be present. Avoid all harness locations.

**⚠ WARNING**

Check for obstructions such as wires, gas lines, exhaust, etc. before drilling or cutting through floor. Failure to do so may result in serious bodily injury and/or property damage.

## AUXILIARY POWER SUPPLY

### ⚠ CAUTION

Do not connect auxiliary devices to vehicle battery. Doing so may result in damage to electrical system and/or electronic components.

**Auxiliary Power Supply:** Do not connect auxiliary devices directly to the vehicle battery. Doing so may result in damage to electrical system and/or electronic components.

Two fuse blocks are provided as an auxiliary power source for dealer-installed auxiliary electrical device(s). Fuse block details and specifications are provided below. The fuse blocks are located in the bottom of the center dash console.

#### **Below Floor Obstructions:**

When installing aftermarket equipment, obstructions below the floor must be avoided. Obstructions include wiring, fuel system, brake lines, etc. Installers must be aware of these obstructions.

Refer to the illustration on previous page to avoid contacting or damaging vital components under the floor.

### ⚠ WARNING

**Risk of electrical fire!**  
Install and electrically terminate auxiliary electrical device as specified by device manufacturer.

**Fuse Blocks:** Two fuse blocks are provided for use as an auxiliary power source (one **Ignition** fuse block and one **Battery** fuse block).

The Battery fuse block provides power at all times (independent of the vehicle ignition). The Ignition fuse block supplies power **only** when the vehicle ignition is on.

The **installer is responsible** for supplying the correct gauge wire and fuse for the particular device to be attached to the fuse block (**as specified** by the manufacturer of the device).

**Ignition Fuse Block:** The total maximum load must not exceed **40 amperes**.

**Battery Fuse Block:** The total maximum load must not exceed **40 amperes**.

**Note:** If installing an auxiliary electrical device that requires more than a **40 ampere** power source, **an alternative power source must be provided**.

**Note:** Battery fuse block position (F3) powers the passenger seat SIR and is not required for vehicles with a manufacture date after 2-25-08.

**Fuse Block Access:** The fuse blocks are located at the bottom of the center console. Remove upper console panel (3 fasteners per side). Remove lower panel.

**Note:** The fuse blocks are part of the gateway electrical assembly. Two grounding studs are also provided.

#### **Under Dash Fuse Blocks**

#### **OEM Fasteners**

# ELECTRONIC CONTROL MODULES

**Diagram - Electronic Control Module Connections / Inputs / Indicators**

The control module assembly is mounted to the bottom of the passenger side third row seat. **Removal of this seat is prohibited.** Tip the seat forward to access the module assembly.

**Computer Port** - Laptop diagnostic connection port to the electronic controller.

**Grounding Studs** - The controller assembly provides two grounding studs.

**Indicator LEDs** - LED's illuminate whenever a switch is grounded (as labeled).

**Kneel Override** - Buttons drive the kneel system in the direction indicated. The kneel LED will illuminate Red when kneeling and Green when unkneeling (raising).

**Reset Button** - Resets controller.

**Speaker Enable** - Turns the internal speaker On and Off. The speaker sounds a tone whenever an operate signal is seen (any con-

trol switch is activated). A tone will also sound if the ramp motor pulls current over the controller preset baseline current.

**Ramp Select Switch** - Sets controller functions to an infloor or foldout ramp.

**Ramp Override** - Buttons drive the ramp in the direction indicated. The ramp LED will illuminate Red when deploying and Green when stowing.

# DIMENSIONS

## Dimensions - 2008 Chrysler Conversion (Foldout Ramp)

All dimensions are for reference only.

### Foldout Ramp

		Foldout Ramp
Door Opening Usable Width (Slide Door)	A	31"
Door Opening Usable Height (Slide Door)	B	52-1/2"
Interior Height at Center of Van*	C	57-1/4"
Interior Height at Driver and Passenger Position**	D	56-1/4"
Ramp Length	E	52"
Ramp Width (Useable Clear Opening)	F	29-1/4"
Ramp Angle (with Vehicle Kneeled)	G	9.2°
Interior Floor Length (Behind Front Seats)	H	57"
Overall Interior Floor Length (Flat Area)	I	86"
Interior Width at B Pillars	J	59-1/4"

Due to manufacturing tolerances both with the OEM vehicle and the conversion components, all dimensions may vary slightly from those shown.

\* Deduct 2-1/2" off of Interior Height for Applications with Overhead DVD/Rail System

\*\* Deduct 3-1/4" off of Interior Height for Applications with Moon Roof
